

Server Requirement

Hardware Requirement:

- OS: [CentOS 7.5](#) ([CentOS-7-x86_64-DVD-1804.iso](#))
- CPU: 2.4 GHz clock speed, 8 kernels, 16 threads or higher (16 vCPUs for the VM)
- Memory: 32 GB or higher
- Disk: 500 GB or higher (The disk must be mounted to the /mvsp directory. Otherwise, it occupies the capacity of the root partition.)

Port List:(All the following ports must be opened on the public network)

Platform	Port	Description
CB3	21083	Device connect port
	20700	Web client login
	20500	Basic platform
	20720	Video OCX upgrade
	20520	Evidence export
	21720	LiveView , device to server
	21700	LiveView , OCX to server
	21800	Device upload files(Videos, pictures, blackbox)
	20710	CB3 application interface, API interface
	21010	File manage (File upload, download, delete)
	21250	API gateway, S17 platform interface
	20711	API websocket realtime push interface
	21701-21710	H5 LiveView
	21711	H5 Playback
Crocus	22210	Crocus login
	21935	Device's remote configuration (N9M device to server)
	21936	Device's remote configuration (web client to server)
	21937	Device's remote configuration (N9M2.0 device to server)
	21938	Device's remote configuration (N9M2.0 web client to server)
	21081	N9M device connect Crocus
	21840 - 21849	FTP data ports, used for old Crocus file download
	21011	FTP listen port, used for old Crocus file download
